**12th Education**
DAV School Moonak
*2020*                    *Moonak , 82%*

## PERSONAL PROJECTS

### TaskTracker: User-Friendly To-Do List Application ⤴
- The Local Storage Todo List App is a full-stack web application that I developed to demonstrate my proficiency in React.js and local storage integration. This project showcases my ability to create efficient and user-friendly task management tools using modern web development technologies.

### JavaScript Memory Power Game Developer ⤴
- Created a responsive memory power game using JavaScript, featuring funny emojis as card symbols. Developed game logic for card flipping, match tracking, and player feedback.
- Ensured smooth functionality and intuitive user experience through rigorous testing and refinement.

### GitHub User Search App (React, Firebase, GitHub API)
- Developed a responsive web application using React that enables users to search for GitHub profiles and explore repositories. Integrated Firebase for secure user authentication and utilized the GitHub API for fetching user data.
- Implemented optimized UI components with Reactstrap. Strengthened skills in state management, API integration, and user experience design.

## SKILLS

`DSA` `HTML` `JavaScript`

`Project Management`

`Customer Relationship Management` `ReactJS`

`OOPS` `CSS` `SQL`
